📖 TECHNICAL PROFICIENCIES

Programming Languages :
JavaScript, C/C++, Java, Python, C#, Kotlin, Solidity

Frontend Development :
React.js, Angular, Vue.js, TypeScript, Node.js
State Management: Redux, React-Redux, @Redux/Toolkit, redux-thunk
Styling : BootStrap, HTML5, CSS3, Tailwind CSS, SCSS
JavaScript Libraries: RxJs, Lodash, Backbone
React : Hooks, Context API, Class-Based Components, Functional Components
Other : SVG, Responsive & Pixel-Perfect UI Integration

Backend Development :
Node.js, Express.js, Nest.js
Python Frameworks: Django, Django Rest Framework, Wagtail
Cloud Services: AWS (including Lambda), Microsoft Azure
Server Management: Postfix (email server)
API Development: RESTful APIs, JSON, XML
Authentication: JWT, Passport, OAuth

Database Management :
SQL Databases: PostgreSQL, MySQL | NoSQL Databases: MongoDB | Query Languages: GraphQL | ORMs:
Mongoose, Sequelize, Prisma

Mobile Development :
React Native, Flutter, Android Development with Kotlin

⊠ AREAS OF EXPERTISE

- Application Design & Development
- API Development & Integration
- Web Front-End Development
- Process Improvement
- Data Visualization
- Database Management
- Agile Methodologies

- Requirements Gathering/Analysis
- Software Development Life Cycle
- Project Management
- Full-Stack Development
- Data Availability & Integrity
- Project Plans Development
- User Training & Support

- Website Performance Optimization
- Code Review & Quality Assurance
- User Experience Optimization
- Site Testing & Debugging
- Technical Issues Resolution
- Amazon Web Services
- Team Building & Leadership

💼 PROFESSIONAL EXPERIENCE

Uvik Software, *Solution Architect*   Aug 2022 – Mar 2024

- Orchestrated SDLC phases using Agile, reducing development time by 20%.
- Slashed project timeline by 10 months through strategic management.
- Conducted Web Scraping for 100,000+ school supply products with NodeJS.
- Doubled revenue by optimizing AI/ML algorithms with Scikit-learn.

Galliot, *Senior Full Stack Developer*   Jul 2021 – Jun 2022

- Delivered 30+ front-end projects with React.js and Vue.js, focusing on user interface.
- Engineered 10+ backend solutions with Express.js and Python/Django.
- Boosted system performance by 25% with RESTful APIs and security measures.
- Designed scalable cloud infrastructure on AWS and GCP, cutting costs by 15%.

Galliot, *Full Stack Developer*   Jul 2019 – Jun 2021

- Leveraged Django, Next.js, React, Node.js, and Laravel for 30% faster development.
- Streamlined workflows with CI/CD pipelines, enhancing delivery by 20%.
- Improved user experience by 10% through effective remote client collaboration.

Digia Technology, *Frontend Developer*   Oct 2017 – Apr 2019

- Developed internationalization sites, expanding global company outreach.
- Implemented Firebase for a real-time content platform, enabling multimedia sharing.
- Acquired experience in a fast-paced industry setting.

Argos Infotech, *Mobile App Developer*   Feb 2015 – Jul 2017

- Created new features and interfaces to maximize app performance.
- Enhanced app performance, reducing load time by 25%.
- Resolved mobile app issues, improving stability by 20%.
- Implemented push notifications, increasing user engagement by 30%.
